Methodology

Performance and Service Excellence Initiative

This initiative aims to identify the best-performing brokerage firm on the ASE over the past year, based on a set of quantitative and qualitative criteria defined and approved by the ASE.

Through this initiative, the ASE seeks to foster a positive competitive environment among its brokerage firms, encouraging them to enhance their activity, and motivating them to develop their services and offer innovative solutions to their clients.

The initiative is based on a combination of quantitative criteria related to the firm's trading activity during the past year, and qualitative criteria related to the services and initiatives implemented by the brokerage firm in accordance with the methodology outlined below.
