Getting Started

Tabadul

A mutual market access model enabling investors to trade directly on onboarded exchanges through their local brokers.

Overview & Eligibility

Tabadul is established on the mutual market access model, enabling investors to trade directly on the onboarded exchanges through their local brokers.

Tabadul is accessible to all investors who have registered with eligible local brokers and completed the required KYC documents in accordance with the local exchange regulations in their country of residence.

Trading Arrangement

- Securities on Tabadul are traded in the local currency of the respective exchange, and in some cases in the specified currency of the traded asset.
- No minimum order amount is required for trading.
- Order entries on any onboarded exchange must comply with the market rules of the respective exchange.
- Tabadul applies trading controls to ensure incoming orders comply with the applicable exchange regulations.
- Investors may trade during the official trading days and hours of each exchange, including adherence to local holidays and market schedules.

Exchange Information

Investors can access market data and updates through the official exchange websites:
